

266 CMR 6.00 STANDARDS OF PRACTICE

STANDARDS OF PRACTICE

A **Home Inspector** practicing in the Commonwealth of Massachusetts shall carry out his inspection and issue his report in accordance with 266 CMR 1.00-12.00

6.01: Access, **Purpose, and** Scope

(1) Access. The **Client** shall provide **Safe Access** and **Sufficient Lighting** to ensure that all systems and areas to be inspected are **Readily Accessible and Observable**.

(2) **Purpose and scope of the home inspection.** The purpose of a **Home Inspection for Residential Buildings**, including their attached garages, performed to the standards of 266 CMR 6.01 through 6.12 is to provide the **Client** with a **Report**. The **Report** should forthrightly disclose physical conditions of the **Systems and Components** listed in this Section that are **Readily Accessible and Observable**, which could reasonably affect the health, safety, and welfare of its occupants, as observed at the time of the inspection. The **Report** should reveal and report conditions which give the consumer a rational basis upon which to decline to enter into a contract to buy or to provide lawful grounds to be relieved from a contractual commitment to buy. An inspection carried out under the standards of 266 CMR 6.01 through 6.12 is not and shall not be construed to be a comprehensive **Architectural** and or an **Engineering Study** of the dwelling in question.

(3) **Home Inspector**s shall:

- a. Observe **Readily Accessible and Observable** installed **Systems and Components** listed in 266 CMR 6.01 through 6.12.
- b. Submit a confidential written report only to the **Client**, which shall:
 - aa. Describe those **Components** specified to be described in 266 CMR 6.01 through 6.12.
 - bb. Indicate which **Systems and Components** designated for inspection in 266 CMR 6.01 through 6.12 have not been inspected and the reason for the failure to so inspect.
 - cc. Indicate the condition of **Systems and Components** so inspected including those, which were found to be in need of repair, require additional investigation, and areas which have a potential for concealed damage.
 - dd. Record the **Client's** name and the address of the property inspected.
 - ee. Record the inspection start and finish times.
 - ff. Record the weather conditions at the time of the inspection.
 - gg. Record the existence of obstructions that interfere with the inspection of the installed **Systems**.

Deleted: (a) Use a written contract and provide only the client with an original copy of the contract.

(b) Observe readily accessible Installed systems and components listed in 266 CMR 1.00-11.00.

(c) Submit a confidential written report only to the client which shall:¶

1. Describe those components specified to be described in 266 CMR 1.00-11.00;
2. Indicate which systems and components designated for inspection in 266 CMR 1.00-11.00 have been inspected;
3. Indicate any systems and components so inspected, which were found to be in need of repair.

- hh. Embed in the **Report** and or attach to the **Report** the list of itemized questions in section 6.01 (5).
- ii. Every **Home Inspector** may have a seal of the design shown below authorized by the board. All reports prepared by a **Home Inspector**, or under his/her supervision shall be stamped with the impression of such seal or bear the name and license number of the **Home Inspector**. A **Home Inspector** shall not impress his/her seal on or attach his/her name and license number to a **Report** if his certificate of registration is not in full force or if he/she was not the author of, or responsible for, such **Report**. By stamping or signing a **Report** a **Registrant** assumes the responsibility for the contents of the **Report**.

(4) The **Report** shall inform the **Client** if additional investigation is required when:

- The scope of the repair(s) is unknown.
- There is potential for and it is suspected that there is concealed damage.
- The subject area is beyond the scope of the **Home Inspector's** expertise.

(5) The **Home Inspector** shall notify his/her **Client** that answers to the following questions should be ascertained from the **Seller** and are relevant to the purchase of a house and may not be **Readily Observable**:

Home Inspector

- Does the **Dwelling** have a history of seepage, dampness, and or water penetration into the basement and or crawl space, if so please explain? Has a sump pump ever been installed used in the basement/crawl space? Do you use any type of dehumidification in any part of **Dwelling**? In addition, are you aware of any mold and or air quality issues in the **Dwelling**?
- Is the **Dwelling** on public or private sewage systems? If the waste system is private, has Title V inspection been completed? If so, is the completed Title V report available for review?
- Has the **Dwelling** ever been inspected and or treated for insect infestation? If so when and what were the chemical used?
- Are there any asbestos products in the dwelling and or on the property?
- Has the **Dwelling** ever been tested for radon gas and or lead paint? If so, when and what were the results?
- Has the **Dwelling** ever been inspected by a **Home Inspector**, if so when?
 - Were any problems noted?
 - Is a copy of the inspection report available?

6.02: System: Roofing

(1) The Home Inspector shall Observe the Readily Accessible and Observable:

- Roof coverings.
- Exposed roof drainage systems.
- Flashings.
- Skylights, chimneys and roof penetrations.
- Signs of leaks on building components.

(2) The Home Inspector shall Describe:

- The type of roof covering materials:
Asphalt, Cementitious, Slate, Metal, and or Tile Shingles. Built-up type (Bald Asphalt, Tar and Gravel, Mineral Covered Rolled Roofing, Ballasted Rubber Membrane, Adhered Membrane, Mechanically Fastened Membrane, Other).
- The roof drainage system:
Gutters (Aluminum, Copper, Wood, Vinyl, Other)
Leaders (Aluminum, Copper, Galvanized, Vinyl, Other)
- The chimney materials:
Brick, Concrete Block, Metal, Other

(3) 2) The Home Inspector shall Report on:

- The methods used to observe the roofing.
- Any signs of previous or active leaks. (c) The condition and recommend repair (if needed) of the Readily Accessible and Observable, roofing Components including: the roof covering, exposed roof drainage systems, exposed flashings, skylights, exterior of chimney(s), and roof penetrations.

(3) The Home Inspector shall not be required to:

- Walk on the roofing unless the Client provides Safe Access and the Seller and or the Seller's Representative provide authorization that relieves the Home Inspector of all liability for possible damage to the roof.
- Observe, Describe or Report on attached accessories including but not limited to solar systems, antennae, and lightning arrestors.
- Observe, Describe or Report on the interior of chimney flues.

6.03 System: Exterior

(1) The Home Inspector shall Observe the Readily Accessible and Observable :

- (a) Wall cladding.
- (b) Entryway doors and windows.
- (c) Garage door operators.
- (d) Decks, balconies, stoops/landings, steps, areaways/window wells, and porches including hand and guard railings.
- (e) Exposed trim (eaves, soffits, fascias rake and other trim boards).

(f) Flashing.

(g) Vegetation, grading, site drainage, driveways, walkways and retaining walls with respect to their effect on the condition of the Dwelling.

(2) The Home Inspector shall Describe:

(a) The wall-cladding materials (cementitious siding, asphalt, wood shingles, aluminum and or vinyl siding, wood clapboards, brick, other).

(b) The deck/porch component materials (brick, concrete, concrete block, steel, wood, other).

(3) The Home Inspector shall Report on the following exposed Readily Accessible and Observable exterior Components including:

(a) Wall cladding.

(b) Entryway doors and windows.

(c) Deck/porches, balconies, stoops/landings, steps, areaways/window wells, including hand and guard railings.

(c) Exposed trim.

(e) Flashings.

(f) Driveways, walkways, and retaining walls with respect to their effect on the condition of the dwelling and there ability to provide safe egress.

(g) Vegetation, grading, site drainage, driveways, walkways and retaining walls with respect to their effect on the condition of the Dwelling

(4) The Home Inspector shall:

(a) Operate all entryway doors and a representative number of windows and Report on the condition and need for repair, if any.

(b) Operate garage doors, if the garage is inspected. The garage doors may be operated manually or by using Permanently Installed Controls as is appropriate. The Home

(2) The ***Home Inspector*** shall ***Describe***:

- a. The type of exposed basement foundation materials (brick, concrete block, concrete, stone, wood, other).
- b. The type of exposed basement floor system (concrete, earth, wood, other).
- c. The type of exposed basement superstructure system (girder(s), sills, floor joists, and sub-floor).
- d. The type of exposed basement columns and posts (brick, concrete block, concrete, steel, wood, other).
- e. The ***Home Inspector*** shall document obstructions that prevented him/her from inspecting the items noted above in the ***Report***.

Formatted: Font: Bold, Italic

Formatted: Font: Bold, Italic

Formatted: Bullets and Numbering

Formatted: Font: Italic

(3) The ***Home Inspector*** shall ***Report On*** the condition and recommend repair (if needed) on the following exposed ***Readily Accessible*** and ***Observable*** structural components including:

Formatted: Font: Bold, Italic

- a. The foundation.
- b. The floor system.
- c. The superstructure system.
- d. The columns and posts.

Formatted: Bullets and Numbering

(4) The ***Home Inspector*** shall:

- (b) Probe exposed ***Readily Accessible*** and ***Observable*** structural components where deterioration is suspected. However, probing is ***NOT*** required when probing would unduly damage any finished surface.
- (b) Report signs of previous water penetration into the basement including the presence of sump pumps and dehumidifiers. (The ***Home Inspector*** is prohibited from activating the sump pump(s) and or dehumidifier(s); it shall be the ***Seller/Seller's Representative*** responsibility to demonstrate that they are functional.)

(5) The **Home Inspector** shall not be required to:

- a. Collect engineering data on the size, span, spacing, species, section modulus, slenderness ratio and or modulus of elasticity of the structural members.
- b. Inspect for the presence or absence of wood destroying insects such as wood damaging organisms, rodents, or insects unless specifically contracted to in writing.
- c. Provide access to the items being inspected (Responsibility of Client/Seller/Seller's Representative).

Formatted: Bullets and Numbering

B: Crawl Space:

The **Home Inspector** shall enter **Readily Accessible** under floor crawl spaces only after the **Seller/Seller's Representative** and/or the **Client** provide **Safe Access** as determined by the **Home Inspector**. The **Home Inspector** is not required to enter any area, including the crawl space if access is obstructed, when entry could damage the property, or when **Dangerous or Adverse Situations** are suspected and documented in the **Report** by the **Home Inspector**.

C: Attic Space:

1. The *Home Inspector* shall enter attic spaces only after the *Seller/Seller's Representative* and or *Client* provide *Safe Access* as determined by the *Home Inspector*. The *Home Inspector* is not required to enter any area, if it is not *Readily Accessible*, if access is obstructed, when entry could damage the property, or when *Dangerous or Adverse Situations* are suspected and reported by the *Home Inspector*.
2. The *Home Inspector* shall observe the following exposed *Readily Accessible* and *Observable* roof framing structural components including:
 - a. The exposed portions of the roof framing, including the roof sheathing.
3. The *Home Inspector* shall:
 - a. Probe exposed *Readily Accessible* and *Observable* structural components where deterioration is suspected: However, probing is **NOT** required when probing would unduly damage any finished surface.
4. The *Home Inspector* shall describe the roof framing system and the roof sheathing:
 - a. Framing: Rafters, Collar Ties, Tie Beams, Trusses, Other
 - b. Roof Sheathing: Boards, Oriented Strand Board, Plywood, Other.
5. The *Home Inspector* shall **Report On**:
 - a. The methods used to observe attics (through a hatch or while standing in the attic space).

- b. The presents and or lack of flooring, obstructions, unsafe access, and dangerous or adverse situations that prevented him/her from inspecting the items noted above.
- c. The condition and recommend repair (if needed) on the following exposed **Readily Accessible** and **Observable** structural components of the roof framing:
 - The roof framing (Rafters, Collar Ties, Rafter Ties, Trusses, Beams, Other)
 - Sheathing Materials (Boards, Oriented Strand Board, Plywood, Other).
- d. Evidence of prior water penetration.
- e. The presence of a light.

6. The **Home Inspector** shall not be required to:

- a. Collect engineering data on the size, span, spacing, species, section modulus, slenderness ratio and or modulus of elasticity of the structural members (**Engineering Service**).
- b. Inspect for insect infestation, rodents and or vermin (**Independent Pest Control/Extermination Service**).
- c. Walk on the exposed and or insulation covered framing members.

Formatted: Bullets and Numbering

Formatted: Font: Bold, Italic

Deleted: ¶

- (1) The inspector shall observe the following exposed readily accessible structural components including:¶
 - (a) The exposed portions of the foundation.
 - (b) The exposed portions of the basement floor.
 - (c) The exposed portions of the superstructure floor system (girders, sills, floor joists, headers and bridging)
 - (d) The exposed portions of the columns.
 - (e) The exposed portions of the roof framing rafters, collar ties, trusses, beams and sheathing materials).¶
- (2) The inspector shall report on the following exposed readily accessible structural components including:¶
 - (a) The type of foundation materials and the condition of the exposed components (brick, concrete block, concrete, stone, wood, other).
 - (b) The type of basement floor system and the condition of the exposed components (concrete, earth, wood, other).
 - (c) The type of superstructure floor system and the condition of the exposed components (girders, sills, floor joists and bridging).
 - (d) The type of columns and condition (brick, concrete block, concrete, steel, wood).
 - (e) Roof structure (rafters, collar ties, trusses, beams) roof sheathing (boards, plywood, oriented strand board, other).¶
- (3) The inspector shall:¶
 - (a) Probe exposed readily accessible structural components where deterioration is suspected. However, probing is NOT required when probing would damage any finished surface.
 - (b) Enter readily accessible under floor crawl spaces and attic spaces only after safe access is provided by the owner and or client except when access is obstructed, when entry could damage the property, or when dangerous or adverse situations are suspected by the inspector.
 - (c) Report the methods used to observe under floor crawl spaces and attics.
 - (d) Report signs of previous water penetration into the building. ¶
- (4) The Inspector shall not be required to:¶
 - (a) Collect engineering data on the size, span, spacing, species, section modulus, slenderness ratio and or modulus of elasticity of the structural members.
 - (b) Inspect for insect infestation.
 - (c) Remove covering and or finish materials to gain access to the items being inspected.¶

6.05 System: Electrical:

(1) The Home Inspector shall Observe the Readily Accessible and Observable:

- (a) Exterior of the exposed service entrance conductors.
- (b) Service equipment, grounding system, main over current device, interior of the main and distribution subpanels (by removing the service and distribution panel covers). However, the Home Inspector is not required to remove the covers if the panel covers are not Readily Accessible and or removal would damage any painted surface and or covering materials (however, it shall be the Home Inspector's responsibility to document the reason for not removing the panel covers in the Report).
- (c) Amperage and voltage ratings of the service.
- (d) Exterior of the exposed branch circuit conductors, their over current devices, and the compatibility of their ampacities and voltages.
- (e) Operation of a representative number of permanently installed lighting fixtures, switches and receptacles located inside the house, garage, and on its exterior walls.
- (f) The number of branch circuits inside the panel(s) and the number of over current devices in the panel(s).
- (g) Whether all bathroom and kitchen countertop receptacles are ground fault protected.

(2) The Home Inspector shall Describe:

- a. Service type as being overhead or underground, cable, encased in conduit, other.
- b. The type of service, feeder, and branch-circuit conductor materials (copper, copper clad aluminum, aluminum, other).
- c. The type of feeder and branch circuit wiring (Armored cable, conduit, tubing, nonmetallic cable, knob and tube, wire mold, other).
- d. The location of the service and subpanels and indicated whether they are Readily Accessible and Observable.

(3) The Home Inspector shall Report on

- (a) The size and the voltage of the main service disconnect (30, 60, 100, 125, 150 and or 200 amp, other service, 120, 120/240, 120/208-volt system).
- (b) The number of branch circuits in the panel(s) and the number of overcurrent devices in the panel(s).
- (c) Report any of the overcurrent devices that are in the off position and recommend the Seller and or the Seller's Representative demonstrate that those circuits are functional.
- (d) The exterior electrical service.

Deleted: Service entry conductor materials (copper and or aluminum, if aluminum are the tips coated with a corrosion inhibitor and is the over load device rated for the use of aluminum wire).

(e) Aluminum wiring, report if the exposed and **Readily Accessible** and **Observable** conductor terminations are properly coated with a termination compound and if the overcurrent devices are identified for use with aluminum wire.

(f) All undedicated exterior electrical receptacles and report polarity, grounding and ground fault protection issues (if any).

(g) If the electrical system is attached to both the city and dwelling side of the water piping and or a ground rod.

(h) Of the neutral and equipment-ground terminal bars and if they are properly attached (bonded) to the panel enclosures.

(i) The compatibility of the overcurrent devices and the size of the protected conductor (Over-Fusing)¹.

(j) Report ground-fault and arc fault protection issues, if any, as determined by the required testing.

(k) Report on any polarity or grounding issues of the receptacles tested.

(l) The exposed and **Readily Accessible** and **Observable** branch circuit wiring.

← Formatted

(4) The **Home Inspector** shall:

(a) Test the polarity and grounding of a representative sample of the three prong receptacles throughout the **Dwelling**.

(b) Test the polarity and grounding of all undedicated bathroom and kitchen countertop receptacles.

(c) Test the polarity and grounding of all nondedicated receptacles in the attached garage and on the exterior of inspected structures and whether said receptacles are ground fault protected.

(d) Test the operation of all Ground Fault Circuit Interrupters.

(f) Test of the operation of all arc fault protective devices.

Deleted: (c) Service type as being overhead or underground.
(d) The number of branch circuits in the panels.
(e) The type of branch circuit conductor materials (copper and or aluminum, if aluminum are the tips coated with a corrosion inhibitor and is the over load device rated for the use of aluminum wire).
(f) The compatibility of the overload protective devices and the size of the protected conductor.
(g) The type of branch circuit wiring (BX, conduit, Romex, knob and tube, wire mold, other).
(h) If there is ground fault protection provided.

(5) The **Home Inspector** is not required to:

(a) Collect engineering data on the compatibility of the **overcurrent devices with the panel**, and or determine the short circuit interrupting current capacity. (**Engineering services**).

Deleted: 3

Deleted: *Inspector*

Formatted: Font: Bold, Italic

6.06 System: Plumbing

(1) The **Home Inspector** shall **Observe**:

(a) The exposed **Readily Accessible and Observable** interior water supply and distribution system including:

1. Piping materials, including supports and insulation.
2. Fixtures and faucets.
3. Functional Flow.
4. Leaks.
5. **Cross Connections**.

(b) The exposed **Readily Accessible** interior drain, waste and vent system, including:

1. Traps; drain, waste, and vent piping; piping supports and pipe insulation.
2. Leaks.
3. Functional Drainage.

(c) Hot water systems including:

1. Water heating equipment.
2. **Normal Operating Controls**.
3. **Automatic Safety Controls**.
4. The exterior of the chimneys, **thimbles** and vents.

(2) The **Home Inspector** shall **Describe**:

1. The type of water supply and distribution piping materials (brass, copper, steel, lead, plastic, other).
2. The type(s) of drain, waste, and vent piping materials (brass, copper, cast iron, lead, plastic, steel, other)
3. The type of water heating equipment, flue pipe and capacity (gas, electric, oil, tankless, solar, other), **the nameplate capacity of the water heating equipment (gallons and or gallons per minute)**.

(3) The **Home Inspector** shall **Report On** and recommend repair (if needed):

- a. **The location of the main shut off valve.**
- a. **The water heater.**
- b. **The existence of a pressure/temperature valve and vacuum relief valve.**
- c. **The exposed flue piping and the existence of thimbles in the chimney.**
- d. **The existence of **Cross Connections** if **Readily Accessible and Observable**.**
- e. **The **Readily Accessible** and **Observable** waste and water distribution systems.**
- f. **The existence of any visible leaks.**

6.07 System: Heating

(1) The Home Inspector shall Observe permanently installed exposed Readily Accessible heating systems including:

- (a) Heating equipment.
- (b) Normal Operating Controls.
- (c) The presence of Automatic Safety Controls.
- (d) The exterior of the chimneys, thimbles and vents.
- (e) Solid fuel heating devices.
- (f) Heating distribution systems including fans, pumps, ducts and piping and supports, dampers, insulation, air filters, registers, radiators, fan coil units, convectors.

(g) The existence of insulation.

(h) The exposed flue piping and the existence of a thimble(s). (i) The presence of an installed heat source in each habitable room including kitchens and bathrooms.

(j) The presence of a fireplace(s) and the operation of their damper(s). (2) The Home Inspector shall Describe:

1. The type of energy source (coal, electric, gas, and oil, wood, other). 2. The type of heating equipment (electric, hot air, hot water, steam, other). 3. The type of distribution system (piping: black iron, copper, and other. Duct work aluminum, fiberglass, steel, other).

4. The insulation.

(3) The Home Inspector shall Report On:

- a. The heating equipment.
- b. The distribution system.
- c. The flue piping and the existence of a thimble(s).
- d. The condition of the fireplace hearth(s)
- e. The presence of exposed flues in the smoke chamber
- f. The fireplace damper(s).

(4) The Home Inspector shall:

(a) If possible, have the Seller and or the Seller's Representative operate the systems using Normal Operating Controls. If not possible for Seller and or the Seller's Representative to operate the systems, the Home Inspector shall operate the systems using Normal Operating Controls and Report On condition of said systems.

6.08 System: Central Air Conditioning

(1) The Home Inspector shall Observe:

(a) Exposed Readily Accessible central air conditioning including:

1. Cooling and air handling equipment.

2. Normal Operating Controls.

(b) Exposed Readily Accessible distribution systems including:

1. Fans, pumps, ducts and piping, with supports, dampers, the presence or insulation, air filters, registers, fan-coil units, condensers.

2. The presence of an installed -cooling source in each room.

(2) The Home Inspector shall Describe:

(a) The type of distribution system (Duct work: aluminum, fiberglass, steel, other) and recommend repair (if needed).

(3) The Home Inspector shall Report On:

a. The distribution system

b. The insulation on the exposed supply ductwork.

c. The operation of the both the distribution and condenser fan.

d. Whether or not the cold gas line is insulated.

e. Whether there is, a service receptacle and a visible service disconnect switch in the area of the condenser and air handling equipment.

(4) The Home Inspector shall

(a) If possible, have the Seller and/or the Seller's Representative Operate the systems using Normal Operating Controls.

(b) Open Readily Accessible Operable Access Panels provided by the manufacturer or installer for routine homeowner maintenance and report on conditions observed.

(3) The Home Inspector is not required to:

(a) Collect engineering data on the size of the cooling equipment and the size or length of the distribution systems.

(b) Report on the adequacy of the air conditioning system(s) to cool the dwelling (Engineering Services).

(c) ***Home Inspectors*** are prohibited from:

1. ***Reporting On the*** market value of property or its marketability.
2. ***Reporting On*** the advisability or inadvisability of the purchase of the property.
3. Offering or performing engineering, architectural, surveying, plumbing, electrical, heating services, pest control, urea formaldehyde and lead paint inspection(s) or any other job function requiring an occupational license and or registration in the jurisdiction where the inspection is taking place, unless the ***Home Inspector*** holds a valid registration and or occupational license, in which case he/she may inform the ***Client*** that he/she is so registered/licensed, and is therefore qualified to go beyond the 266 CMR 1.00-12.00. Should the ***Home Inspector*** offer any service requiring a registration and or occupational licenses he/she shall be required to specify and list additional services not required under

Deleted: Offer or perform any act or service contrary to law. ¶
<#>Offer warranties or guarantees of any kind. ¶

8. Verifying property lines and or determine location of property lines (Registered Surveyor).

Formatted: Bullets and Numbering

9. Calculating the strength, adequacy, or efficiency of any system or component. (***Engineering Service***)

Formatted: Bullets and Numbering

Formatted: Font: Bold, Italic

10. Operating any system or component that is shut down or otherwise inoperable. However, the ***Home Inspector*** shall recommend the ***Seller*** and/or the ***Seller's Representative*** demonstrate that those systems and or components are functional.

Formatted: Bullets and Numbering

11. Evaluating acoustical characteristics of any system or component. (***Engineering Service***)

Formatted: Bullets and Numbering

Formatted: Font: Bold, Italic

12. Inspection of surface and subsurface soil conditions. (***Engineering Service***)

Formatted: Bullets and Numbering

Formatted: Font: Bold, Italic

13. Turning on any electrical or fuel supply and or devices that are shut down. However, the ***Home Inspector*** shall recommend the ***Seller*** and or the ***Seller's Representative*** demonstrate that those systems and or components are functional.

Formatted: Bullets and Numbering

Deleted: Determine Building Code and or Zoning violations.

Formatted: Indent: Left: 1.25"

⁴ By definition, these controls are automatic in function; because of the need for special tools, possible conflict with normal operating controls, and damage to equipment and distribution systems. Testing of the automatic controls could endanger not only the ***Home Inspector*** but the ***Dwelling*** as well because of the excessive pressures and or currents needed to made the control react as designed. Testing is ***technically exhaustive*** and beyond the scope of the Standards of Practice. Testing should only be done by an appropriately licensed service technician and or engineer familiar with the operation of the control and or device. Testing should comply with the protocols established by the recognized national testing laboratories and or testing agencies such as Underwriters Laboratory, Factory Mutual, ASME, etc.
